International application No.

PCT/JP2005/006334

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	<u>1-13</u>	YES
	Claims	_____	NO
Inventive step (IS)	Claims	<u>2-9</u>	YES
	Claims	<u>1, 10-13</u>	NO
Industrial applicability (IA)	Claims	<u>1-13</u>	YES
	Claims	_____	NO

2. Citations and explanations:

Document 1: JP 2003-166826 A (Yamaha Corp.), 13 June 2003,
Column 3, line 50 to column 5, line 22: column 7, lines 20-42, Fig.1,
Fig. 2 (Family: none)

The inventions of claims 1 and 10-13 do not appear to involve an inventive step based on document 1.

A bearing display device described in document 1 is a device which corrects values measured by a terrestrial sensor depending on behavior mode, but updating the display when implementing the corrections could easily be achieved by a person skilled in the art.

The inventions of claims 2-9 are neither described in any of documents cited in the ISR, nor obvious to a person skilled in the art.

WRITTEN OPINION OF THE

International application No.

PCT/JP2005/006334

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claim 1 describes "...said control section monitors variations on behavior of an electronic component mounted on the bearing display device and carries out display updates of the bearing information depending on the occurrence of the event...". However, because no description of "event" is found before the description of "the event", the meaning of "the event" is not clear.
